SUMMARY

Frontend Developer with 3.5+ years of hands-on experience building and maintaining React.js, Next.js, and TypeScript applications for banking and government portals. Strong in component-driven UI development, performance tuning, REST API integration, testing, and code reviews. Translates Figma designs into clean, production-ready UIs, enhances load time and SEO, and collaborates closely with Agile teams. Proven track record in streamlining the development lifecycle by leveraging AI tools (Claude, GitHub Copilot) to accelerate delivery, enhance code quality, and resolve complex L3 production issues within Agile environments.

SKILLS

Languages & Core: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS/Sass.

Frameworks & State: React.js, Next.js, Redux Toolkit, RTK Query.

Styling & Visualization: Tailwind CSS, Material UI (MUI), SVG, BEM methodology, Bootstrap, Highcharts, Recharts, AG Grid, Figma.

Testing & Quality: Jest, React Testing Library, Code Reviews, Unit Testing, Code Debugging.

Tools & DevOps: Git, GitHub Actions, Azure DevOps, CI/CD pipelines, Vite, Webpack, Babel, NPM.

API & Auth: REST APIs, Axios, Postman, JWT Authentication.

Development: Component-driven UI development, Performance tuning, SEO improvement, Translating Figma designs to code, Improving load times, Debugging.

Collaboration: Agile teamwork, Mentoring junior developers, Stakeholder communication, User-centric design, Leveraging AI tools for productivity.

EXPERIENCE

Associate Software Developer

Synechron Technologies

November 2022 - April 2026, Pune, India

- Led front-end development for high-traffic government and banking portals (100,000+ users), transforming complex Figma designs into reusable React.js and TypeScript components.
- Architected a scalable component library and design system, standardizing UI patterns and significantly reducing development cycles by eliminating redundant implementations.
- Optimized application performance using Webpack 5, code splitting, and tree shaking, achieving a 40% reduction in load times and increasing Lighthouse scores to 95+.
- Integrated REST APIs and Microservices via Axios and RTK Query; managed the front-end JWT authentication flow with RBAC and secure token storage.
- Scaled platform reach by implementing Next.js (SSR/SSG) strategies, driving organic SEO growth and improving system stability in production.
- Established code quality standards for a 16-member Agile team through PR reviews, enforcing TypeScript strict mode, BEM methodology, and mentoring junior developers.
- Managed DevOps workflows via Azure DevOps, including Git branching strategies, sprint tracking on Azure Boards, and monitoring CI/CD pipelines for automated deployments.

Software Developer Intern

TestYantra Software Solutions

May/2022 - Oct/2022, Pune, India

- Developed and tested React.js functional components using HTML5, CSS3, and JavaScript during a 6-month internship, supporting senior developers on UI implementation and bug fixing across sprint cycles.
- Utilized SQL queries (joins, filters) to fetch and validate backend data, ensuring data accuracy between the database and React UI during testing phases.
- Gained hands-on experience in the SDLC, participating in daily stand-ups and contributing to code documentation and bug-fixing efforts.

EDUCATION

Bachelor of Engineering, Mechanical Engineering

SITRC • Nashik, Maharashtra • June/2018 - July/2022 • 8.27/10

PROJECT

Roads & Transport Authority Portal (RTA UAE)

Synechron Technologies • October 2023 - April 2026

- Led front-end development of a high-traffic government portal for 100,000+ users and built a reusable React.js component library with TypeScript.
- Used React Hooks in functional components to handle DOM manipulation and form interactions across dynamic portal modules.
- Built Redux Toolkit and RTK Query workflows for complex state management across multi-module portal features.
- Integrated Highcharts and Recharts libraries to transform complex Figma designs into highly customized, interactive data visualizations for user-specific dashboard.
- Focused on building responsive line, pie, and multi-series charts that maintained pixel- perfect design fidelity while optimizing performance for dynamic api data.
- Delivered 700+ responsive UI components from Figma designs using Tailwind CSS, reduced bundle size by 40% through code splitting and lazy loading, and maintained 95% UI test coverage.
- Enforced SCSS/BEM conventions, Styled Components patterns, strict TypeScript checks, and code review standards to reduce regressions and keep the component library modular and scalable.

Merrick Bank Web Application

Synechron Technologies • March 2023 - August 2023

- Built a mobile-responsive banking web app from scratch in Next.js, TypeScript, and Tailwind CSS with REST API integration.
 - Used functional components and React Hooks (useState, useEffect, useCallback) to manage UI state and handle form interactions across banking screens.
 - Improved Core Web Vitals with image optimization, dynamic imports, lazy loading, and reusable components.
 - Standardized build scripts with Webpack and Babel and kept the codebase maintainable with Tailwind utility classes.
-

CERTIFICATIONS

AWS Certified Cloud Practitioner

Amazon Web Services (AWS) • 2026

AWARDS & HONORS

Star Performer Award

Synechron Technologies

- Recognised for leading the successful delivery of key enhancements to the RTA UAE Government Portal, resulting in improved user engagement and streamlined processes.
-
